The model of the means and the method of identification of bovine animals

The eartag of a bovine animal is yellow and made of plastic. The eartag shall bear the ISO code denoting Estonia "EE" and the unique registry number of the animal consisting of ten figures. The eartag shall also bear a bar code carrying the information which is printed on the eartag.

Information on the first part of the eartag is printed in four rows: the logo of the Animal Recording Centre and the ISO code denoting Estonia "EE" are printed in the first row, the first five numbers of the registry code consisting of ten figures are printed in the second row, the bar code is printed on the third row and the following five numbers are printed in the fourth row.

Example:

1st row: logo 2nd row: 00044 3rd row: bar code 4th row: 00097

Information on the other part of the eartag is printed in three rows: the logo of the Animal Recording Centre and the ISO code denoting Estonia "EE" are printed in the first row, the first five numbers of the registry code consisting of ten figures are printed in the second row and the following five numbers are printed in the third row.

• Model of the eartag used for identification of bovine animals borned since 1st of January 2000 (female) and 1st of June 2000 (male)

Animal identification number shown on the plastic eartag shall be read in the following sequence "EE0004400080".

• Model of the eartag used for identification of bovine animals borned before 1st of January 2000 (female) and 1st of June 2000 (male)

Animal identification number shown on the plastic eartag shall be read in the following sequence "EST0000402395".

If this marking is lost or becomes illegible, the keeper shall tag the bovine animal with new eartags bearing identical registry numbers by the insertion of the eartags in each ear. Replacement of the eartag will bear the country code "EE" and the former registry number which remains the same throughout the lifetime.
